

Protein Picks

5210 Introduction

Did you know that your body's tissues, muscles, organs and immune system are mostly made up of protein? And so are the outer layers of your hair, nails and skin! Protein also helps your muscles grow, increases strength and improves athletic performance. Check out the challenges to learn how to vary your proteins and ways to incorporate more protein servings in your diet.

 Did you know kids on average need to eat about 0.5 grams of protein for every pound (0.5 kilograms) they weigh. That's a gram for every 2 pounds (1 kilogram) they weigh. By eating more protein-rich foods throughout the day, your kids will feel fuller between meals and can result in less snacking. To see what proteins have to offer, visit <https://bit.ly/2GqYfsK>.
